

HANDMADE FOR YOU

All our products are handmade in Vietnam and China. The social impact we create, is to support more than 300 families and help them improve their lives.

No mass production in big factories, but small, scale projects with long-term personal partnerships. We work intensively with honest and personal partners that often have small, scaled businesses, and believe in our vision; to conquer the world with traditionally produced baskets, bags and other items, made from recycled materials as much as possible. Everything we design is manufactured in an ethical and responsible way, in which 100% free of child labour is guaranteed.

DESIGNED FOR YOU

Our collections are developed in our design studio. We are constantly looking for trends in lifestyle, home and the environment and talk to our customers about their needs. You will find a button with our handprint on every Handed By product, showing that you have a unique, high-quality and trendy product in your hands. It all starts with a unique design, developed in our design studio in the Netherlands with recycled materials as the basis for each product.

RECYCLED FOR YOU

Join us on our journey and help us reduce plastic waste by giving it a second chance!

All Handed By collections are made with recycled plastic. By using recycled plastic, we slow down the process of exhausting the earth's natural resources. By making sustainable products that last almost a lifetime, we generate even more positive impact on the environment.

FAIR MADE FOR YOU

All weaving groups that work for Handed By are BSCI certified. This means that social norms are safeguarded and monitored throughout the entire weaving process. Our standards combine a range of economic, environmental and social criteria that are independently verified as part of BSCI certification. These criteria reflect fair trade's objectives to promote sustainable production and decent livelihoods.

'Fair made' products are changing the way trade works through better prices, decent working conditions and a fairer deal for our weavers in China and Vietnam and of course using a selected range of sustainable materials.
